My Haskell

Something here

Just an example.

My Haskell

blablablablablablabla... blablablabla...

Something here

some Haskell code ?

```
----- source code begin -----  
-- ch07/basicio.hs  
main = do  
    putStrLn "Greetings! What is your name?"  
    inpStr <- getLine  
    putStrLn $ "Welcome to Haskell, " ++ inpStr ++ "!"  
----- source code end -----
```

So ?
